Area	Findings
Refuse area	In general we found that this area is at a manageable state with regards to all general pests associated with restaurants
Inside Dining area	All areas inside the restaurant were sprayed. All aerosol cans were replaced, inside the dining area as well as in the bathrooms.
Inside Kitchen area	All relevant areas in the kitchen area were treated against cockroaches and any other general insects. All relevant areas were baited for cockroaches.
Outside perimeter walls	The entire outside perimeter walls were sprayed for all general insects, including in the play area.
