Rodents

Outside

Address: 361 9th Street, Midrand

Date	Area	Treatment Done:
Apr 2019	Building 1 – Acacia	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• The rodent activity had decreased slightly
	Building 2 – Baobab	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• We noticed that the rodent activity increase at the far end of the parking area
	Building 3 – Coral	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• The activity at this building has increased slightly
	Building 4 – Flamethorn	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• The rodent activity at this building is still manageable at this stage.
	Building 5 – Dombeya	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• There is still a lot of rodent activity at this building.
	Building 6 – Gardenia	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• All boxes at this building were checked and re-baited
	Building 7 – Ebony	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• There was an increase in activity, but is still manageable at this stage.
	Refuse area	<ul style="list-style-type: none">• All rodent boxes were sprayed for snails and other general insects.• Increased rodent activity detected in the main refuse area only due to the refuse bags not being taken away immediately

Area	Findings
General findings	<p>All rodent boxes were sprayed for general insects and snails to make sure the rodent activity in your complex decreased.</p> <p>Please take note that we have noticed an increase of people living on the outside of your fence that can also cause the rodents infestation to increase.</p>
