Rodents

Date	Area	Treatment Done:
Mar 2019	Take Away Counter	<ul style="list-style-type: none">These counters need to be cleaned as the deep fryer is covered in sticky oil residueThe pest is still manageable in this area
	Take Away Kitchen	<ul style="list-style-type: none">Pestimators found that this kitchen still has a problem with cockroaches.All electrical plugs were treated and sprayed. We found nests in all of the plugs.This area will have to be monitored very closely
	Bakery Kitchen & Store Room	<ul style="list-style-type: none">No pest detected in this areaThe pest is still manageable in this area
	Main Store Room	<ul style="list-style-type: none">This area was sprayed for general insects
	Butchery Kitchen	<ul style="list-style-type: none">We did spray this area for general insects
	Butchery Counter	<ul style="list-style-type: none">The pest in this area is under control, but will still be monitored due to the flies this area attracts.
	General Store Area	<ul style="list-style-type: none">The entire store was treated for general insects.
	Offices	<ul style="list-style-type: none">All offices and back kitchens were treated for general insects.
	Rodent boxes	<ul style="list-style-type: none">All boxes were checked and re-baitedIncreased rodent activity detected in the main refuse area only.
	Refuse area	<ul style="list-style-type: none">All boxes were checked and re-baitedIncreased rodent activity detected in the main refuse area only.

Area	Findings
Refuse area	In general we found an increase of activity in this area. This area will be monitored closely with each visit, as the rodents are attracted to the refuse.

General findings

The take away kitchen is still infested with cockroaches. This area will have to be monitored closely as we found several nests in this area's electrical system.
