Customer: Duan Rossouw Date: 14 Oct 2019 Inspection ☒
Address: 7 Christiaan De Wet Rd OD Reading: Treatment ☒
Rooihuiskraan, Centurion Pest / s: Rodents & Ants

Area	Treatment Done:	Pest
Outside	Re-baiting of 3x Tamper Proof Bait Stations, strategically placed out of sight.	Rodents
Inside	Re-baiting of 8x Cardboard Bait Boxes in the ceiling of the garage and tv room, strategically placed out of sight	Rodents

Pest	Poison	Amount Used
Rodents	Rodent bait	+/- 22 blocks

Area	Inspection Finding:	Pest
Inside and Outside	Black ants found on the outside perimeter walls of the house and in the paving. Black ants found inside the kitchen and washing area	Rodents

Notes	<ul style="list-style-type: none">- It is our recommendation to spray the inside and outside perimeter walls of the main house, including the lawn area.- When spraying the lawn area as well, you form a poison barrier on the outside perimeter boundary walls up to your home- The spray we use inside is pet and human friendly- We will also recommend fumigation on the inside to kill the current insects in your house. With the fumigation all pets and humans, including any other animal that needs oxygen – eg fish, reptiles etc – need to be moved to the outside of the house, as the garage area will also be fumigated.- The spray used outside is not pet and human friendly for about 2 hours – until the poison has soaked into the ground of have been dried by the sun. After this period of time, it is save for all pets and humans to walk and sit on the grass.
